

POLICY OF SUPPLY CHAIN SECURITY

TENZA cast, a.s.

The company TENZA cast, a.s. is aware of the ever-increasing requirements for ensuring the supply chain security. The security is essential for growing industry, increasing turnover and market globalization. To ensure the protection of its business activities and the activities of its customers, the company TENZA cast, a.s. has implemented a supply chain security management system in accordance with ČSN ISO 28000 standard.

The concept of security is understood as a resistance to intentional actions aimed to damage the supply chain. Our primary goal is therefore to maintain an effective management system for threats identification, risks assessment as well as for control and reduce of their consequences.

As part of our activities – i.e. die casting, machining, finishing and selling of zinc alloy die castings - the company therefore is committed to implementation of this policy:

- **To ensure the supply chain security and to ensure their protection in accordance with the legal requirements of the Czech Republic and the European Union. To ensure the requirements arising from contractual obligations.**
- **To identify security threats and risks related to supply chain security management regularly. To assess the identified risks and take the necessary management measures to eliminate the risks or reduce the impact of their severity.**
- **To ensure systematic training of employees in the field of safety through an in-house system of support for professional training of employees.**
- **To ensure compliance with the requirements of supply chain security in all activities performed through the personal responsibility of each employee of the company and the appropriate division of labour.**
- **To increase the effectiveness of the safety management system and to continuously support safe and modern management methods, information systems and technologies used.**

Adamov, 13 January 2020

Ing. Michal Sázkavský
Chairman of the Board of Directors
TENZA cast, a.s.
